Newsletter # 2 - to 26th October 2011

Welcome to our second newsletter. You can get previous newsletters from our website on www.positivemoney.org.nz/Site/Newsletters/newsletters.aspx

I would like to start by correcting what was said in our first newsletter relating to a comment by Ben Dyson at our launch.

Ben was reported as saying that “finally the Bank of England was issuing money debt free. The only problem that this money was **being provided to the Banks** – to help them out with their liquidity.”

What he actually said was that “the Quantitative Easing proves that the Bank of England can create money if it wants to, but in this case it's being pumped into the banking system.”

I apologise for the mistake and will take more care in future. The version on our website has been updated.

Following is an extract for the Positive Money UK newsletter that you may be interested in

New book - Guide to Money “Where does money come from?”

This brand new book is the **most comprehensive and authoritative guide to how money is created ever published**. It reveals that **most of the textbooks are very much out of date**.

The basic analysis of this book is neither radical nor new. In fact, central banks around the world support the same description of where new money comes from. And yet many naturally resist the notion that private banks can really create money by simply making an entry in a ledger. This book aims to firmly establish a common understanding that commercial banks create new money.

Foreword by Prof Charles Goodhart, one of the leading authorities in banking. You can **order the book here**
